jira - Why is my Backlog and Active Sprint missing issues listed in All ...

However, my Backlog shows that there are 149 issues without any filters applied, implying that there are 56 issues that are not being shown. I have identified several of the missing issues, but cannot discern why these issues are not showing up either in my active sprints or the backlog, regardless of whether or not they are assigned to a sprint.

azure devops - Stories and tasks not being displayed in sprint ...

We have our user stories and corresponding tasks (set as children of the stories) moved into particular sprint. Along with those, we have some bugs put into the same sprint, too. Now, if we set W...

Azure Devops picking the "wrong" sprint to show in Sprint board

The problem arises when trying to show the Sprint overview in Azure Devops. Earlier, when we had a "flat" list of our sprints / iterations, Azure Devops would also jump to the "correct" sprint as the "current" sprint and display it - based on the "from" and "to" dates of that sprint.

Is there a way to list all active sprint names on all projects in the ...

1- You can create and save a filter that get all the issues that are in an open Sprint. The JQL is : Sprint in openSprints (). 2- Create a new board that uses the filter created in step 1. 3- Open the board and go to the Backlog view to see a list of all the open Sprints and the issues in the Sprints.

Split Azure DevOps user story to backlog instead of next sprint

On the Sprint board in Azure DevOps, a Split option is available for use on a user story at the end of a sprint to create a copy of the story and assign it to the following sprint along with existing associated tasks that aren't closed.

agile - What is the difference between Sprint and Iteration in Scrum ...

Is there a difference between Sprint and an Iteration or one can have Iterations within a Sprint or Sprint is just the terminology used instead of Iteration in Scrum? It will be helpful if someone can throw some light on this.

How to get all sprints in project using JIRA REST API

4 Let's make some assumptions before writing code: Board Name same as project name There will be only one board with that name We have a Sprint model I am using Jersey client here to retrieve data from JIRA. Helper methods Code for retrieving sprints edited Aug 11, 2016 at 5:30 answered Aug 9, 2016 at 18:57 lch

How to tell what was planned in a sprint? - Stack Overflow

Yes I can see what is currently in the sprint, but how can I tell what was originally planned in a sprint? I would like to be able to query this for a chart on my dashboard. Additionally, I want to...

go - Why would you use fmt.Sprint? - Stack Overflow

13 fmt.Sprint is good for concatenating parameters of different types as it uses reflection under the hood. So, if you need to concat strings - use " + ", it's much faster, but if you need to concat a number and, for example, a string - you should use fmt.Sprint just like that:
