Great Barrier Reef suffers largest annual coral decline

Coral cover across the Great Barrier Reef has experienced its largest annual decline since records began, a report from the Australian Institute of Marine Science (AIMS) has found. AIMS surveyed the health of 124 coral reefs between August 2024 and May 2025, finding that 48% of reefs underwent a decline in percentage coral cover.

What the great wealth transfer means for economic growth

The great wealth transfer of the next two decades is a major event. It will help determine who creates real world investment and how much money is available for private sector investment.
