heating entire house from basement | Hearth.com Forums Home

we are looking at buying a house that has a stone fireplace in the living room and a place in the basement to connect a woodstove, the house is 1456 sq ft on one floor and the basement is same sq. footage and completely open. was wondering if placing a woodstove in the basement wood supply...

100# Propane Tank to House - Hearth.com Forums

The 500# tank is probably connected with a copper line with a fitting on the end to mate to the tank's nozzle. To use the 100# tank first compare the nozzle on it to the 500# tank and see if they are the same. To connect with the 100# tank using the flex hose there will need to be an adapter going from the flex hose end fitting to the 500# tank fitting on the copper line. PS: Thanks for the ...

Will a Wood Stove Smell-up The House??? - Hearth.com Forums

The latest road block on my way to burning wood in the house is that my Wife is afraid that the whole house will smell like wood smoke - everything, clothes, clothes in the closet, furniture, carpet, the dog, etc., and if she ain't happy, nobody is happy! Will a nice modern wood stove smell-up the house?

House will get "too hot" with a wood stove? - Hearth.com Forums

The climate where the house will be has average lows during winter a little below freezing and the record low being around zero. The house will be heated and cooled with mini splits. The designer/builder has told me that a wood stove would be too hot for the house because it will be so well sealed and insulated. Is that a thing?

Tips on if Your pellet stove is burning lazy and or getting smoke in ...

If you are getting smoke in the house or you stove just don't seem to be burning like should. Check the door seal and latch for a tight fit. Check the ash pan for shut tight and latched If all doors seals are good and latched. MOST pellet stove are Negative air. (Inside of the Firebox is...

Why does my gas boiler run when the house is warmer than

the set temp?

The house has radiator heat. The boiler kicks on intermittently when the thermostat shows that the house is 4-5 degrees above the set temperature. Is this a design feature of high efficiency boilers since it may take a while to bring the house up to temp with radiators or is there something wrong with the thermostat or boiler control?

Vermont casting dauntless | Hearth.com Forums Home

I will start by saying that I have never spent so much time and effort into something and still lack proper understanding of operation. My frustration with this stove has been immeasurable. I just bought this stove, without a cat, this year as I moved into a new house, and replaced the old stove...

Two story house - radiant in-floor on main floor only - who's done it ...

The house is fairly well insulated with good windows. It runs fairly stable around 60 on second floor. I run first floor at around 65. this is with temps in the teens at night and twenties during the day. I would like to like it warmer but wood supply and homemade boiler can only do so much. Jensen wood boiler 250 gal storage 1970 C30 dump 1200 ...

Wood Stove suggestions for new to me 2500 sqft house

Moving heat from basement How many people heat their house with a wood burning stove that's in a uninsulated. Basement rim joists that are insulated. beside the basement walls ?

Creosote running down outside of pipe, inside of house

The past few days, creosote is running down the outside of the pipe that is inside the house, between the ceiling and the stove. The exterior pipe looks fine. Also, this fall we had resealed around the pipe where it meets the roof. I appreciate your thoughts and suggestions to help us figure out what is going on. Englander 13 - This IS our furnace.
