The Bravest Browser - Reddit

For discussion regarding the Brave web browser and BAT project, including the team, future plans, and current builds.

How good is Brave in terms of security and privacy? - Reddit

Out of the box, brave is probably better, but if you do a bit of configuration, i think Firefox wins by quite a bit in terms of security and privacy, and a lot in terms of convenience and performance.

Brave or Firefox? : r/browsers - Reddit

Brave > Firefox I know Firefox can be modified for privacy and performance. However, if an update comes, the modifications may or may not work as they did before. Then new modifications might become necessary. On the other hand, Brave has privacy and performance by default. So I don't need to mess with the settings and deal with any broken modification after an update. As for Firefox fork, you ...

What are your guy's honest thoughts on Brave Browser?

I am an avid chrome user and I love chrome but I have recently come across brave and quote like it's idea and functionality. What are your guy's thoughts on it and is it safe (as in people claiming it makes money in malicious ways)? Thanks.

Brave vs Edge vs Firefox - Browser Benchmarks + RAM & CPU Usage ...

Conclusion Concerning Brave, Brave looks to have substantially lower benchmark scores than Edge. I'm interested as to why Brave is touted as being quicker and more efficient than Chrome, while it is not (Brave utilize a much greater RAM and CPU than Edge and Firefox too). Additionally, Brave eats substantially more battery than Firefox as well!

Brave Browser, is it as unsecure as the FireFox users say?

Mostly Brave got accused to being a non-privacy browser with trackers and other unsecure stuff. I just switched to Brave from Vivaldi so I was worried and wanted to investigate the claims, because what are my privacy steps worth if I use a browser that tracks me? I will only look at Brave not Firefox or other browsers.

Firefox vs Brave : r/browsers - Reddit

Brave is really private out of the box, plus being a Chromium browser, it has all the performance

benefits you'd expect from a Chromium browser. Firefox has the advantages and disadvantages of engine independence.

Brave or Opera? : r/browsers - Reddit

Brave is better for privacy, but some of their business practices have been questioned in the past. Opera has most customization and abilities, as long as you don't want a home page / button. Opera, also has had some questionable business practices. Based on testing (I'm a dev and have to test our SaaS apps with all major browsers), Brave tends to load pages a bit faster and is a bit lighter ...

Brave vs Chrome : r/brave - Reddit

Brave is for people who only care about privacy, but still want chrome features, Firefox is for people who are super into privacy, or want their browser to be theirs.

Brave vs Fire fox (pros and cons) : r/browsers - Reddit

Brave pros: It's faster and sites work better on it. Out of the box privacy, security, protection, being chromium based it has better fingerprinting protection and per-site process isolation on Android. Sync takes a bit of tinkering to set up but it's faster and more consistent than FF. Very strong built-in adblocker. Cons: Cryptocrap. Lack of customization Brendan Eich is a homophobic, anti ...
