Toric | Unlock your data flows

 Say hello to the data pipeline of your dreams. Everything you need from an ETL platform with AI built-in.

Why Toric

Toric specializes in data movement and data ingestion pipelines for all major construction data sources. This gives you a single source of truth to turn your data into insights without writing any code and make it analysis-ready in a destination of your choice.

Toric | Overview

Toric is an all-in-one data analytics workspace designed for the construction industry. The workspace specializes in automated data pipelines to streamline the process of data ingestion, storage, processing, transformation, and analysis.

How to Use Revit Data to Perform Cost Estimation Analytics ... - Toric

Learn how to perform cost analytics and quantities takeoff using Revit Data in Toric. Read our step by step guide on how to configure the Revit integration, build your data Flow, and create an interactive visualization.

Toric | Introducing Thiago da Costa | Chief Executive Officer

Toric specializes in data movement and data ingestion pipelines for all major construction data sources. This gives you a single source of truth to turn your data into insights without writing any code and make it analysis-ready in a destination of your choice.

Toric

Toric has developed a no-code data platform that allows companies to leverage the information created and surfaced during construction projects to significantly improve core operations and make smarter, data-driven decisions that save costs, improve productivity, and reduce execution time.

Toric | Connectors

Connectors Pull from 50+ data sources and push to 15+ destinations.

Data Integration - Toric

Toric provides automation for extracting data from a source, transforming it, or loading data into a targeted system (like a warehouse or data lake). Users can track the history of Automations natively within the Toric UI.

Support - Toric
