All Ventures new and old use the same type of shims (25 mm diameter). Also many Hondas (CB 750, CB 900, CB1000, CBX six cylinders), also the old V-Max (I don't know about the new ones) and FJ 1100 and 1200 Yamahas. Some of the liquid cooling 3 cylinders Triumphs also use them. And guess what? Some old Toyota cars from the 80's also use these shims.

All Ventures from 1983 to 2007 appear to use the same u-joint in the driveshaft. Below is a chart with brand names and part numbers of commonly available replacement u-joints that your local auto parts supplier should be able to obtain for you. Pictures below are courtesy of member la_pryor as he did the u-joint replacement on his 1st gen Venture.
