Public-private collaboration on water, key to achieving SDGs | World ...

Protecting the global water cycle can help us achieve many of the SDGs. Here's how public-private partnerships can unlock innovative solutions for a sustainable future.

Why water is the catalyst for the next wave of global growth

With coherent policy, innovative finance and collaboration, water infrastructure can become a catalyst for sustainable growth and long-term resilience.

Water Futures: Mobilizing Multi-Stakeholder Action for Resilience

This report outlines key pathways to strengthen water resilience, through private sector and multi-stakeholder action, and secure the future of water for society and the global economy. Access to freshwater is changing rapidly, with water stress affecting billions of people and countless businesses each year.

Digital twins are transforming the world of water management

The world is facing a growing challenge of water scarcity, which is set to accelerate this century. While already in use in manufacturing and agriculture, digital twins could also be transformative for the water management industry. Already, case studies are emerging on how digital twins in water management can improve efficiency, saving clean water and improving services.

Here are 5 ways we can build global water systems resilience

Water scarcity, pollution and extreme weather events driven by climate change, population growth and industrial demand are pushing global water systems to critical levels. Building water resilience hinges on cross-sector partnerships, tailored financing and adopting innovative governance and policy frameworks. Five essential strategies - holistic water valuation, fit-for-purpose financing ...

The key to solving the global water crisis? Collaboration

The world is facing a water crisis - it's estimated that by 2030 global demand for water will exceed sustainable supply by 40%. Water is a highly complex and fragmented area. That is why collaboration is key to helping solve this challenge, experts say. The Aquapreneur Innovation Initiative, from the Forum's UpLink platform, is connecting water start-ups with stakeholders across the sector ...

COP29 Water Day: How to finance global water resilience

A global water crisis caused by land use changes and climate change is affecting economies, societies and the planet. Here's how to build water resilience.

Japan's water infrastructure is being renewed. Here's how

Japan is reimagining water infrastructure with tech, transparency, and collaboration to boost resilience amid ageing systems and climate challenges.

What new water circularity can look like for data centres

Data centres cause accelerating water usage, requiring innovative water circularity solutions; however, collaboration will be critical for their success.

What will it take to grow investment in water infrastructure?

Water is becoming an increasingly high priority globally – here's how leaders are redefining investment in water systems to drive resilience and growth.
