Cafeína: ¿qué cantidad es excesiva? - Mayo Clinic

Si consumes cafeína para despertarte y mantenerte activo, no eres el único. Millones de personas consumen cafeína todos los días para mantenerse alerta y mejorar su concentración. ¿Qué cantidad de cafeína es excesiva? Hasta 400 miligramos (mg) de cafeína al día se consideran seguros para ...

Caffeine citrate (intravenous route) - Side effects & uses

Description Caffeine citrate injection is used to treat short-term apnea of prematurity when premature babies (infants between 28 and 32 weeks gestational age) stop breathing. Apnea of prematurity is caused by the baby's breathing centers not being fully developed. This medicine is available with or without your doctor's prescription.

Caffeine: Is it dehydrating or not? - Mayo Clinic

As a chemical, caffeine increases production of urine, which means caffeine is a diuretic. But most research suggests that the fluid in caffeinated drinks balances the diuretic effect of typical caffeine levels. High doses of caffeine taken all at once may increase the amount of urine the body makes. This is more likely if you aren't used to ...

Caffeine: Does it affect blood sugar? - Mayo Clinic

For some people with diabetes, one cup of coffee may raise or lower blood sugar. Learn how caffeine can affect blood sugar.

Caffeine: How does it affect blood pressure? - Mayo Clinic

How does caffeine affect blood pressure? Caffeine may cause a brief rise in your blood pressure, even if you don't have high blood pressure. This short-term spike in blood pressure happens mainly in people who don't drink caffeine often, rather than in those who do. Still, the blood pressure response to caffeine differs from person to person.

Acetaminophen, caffeine, and dihydrocodeine (oral route)

Description Acetaminophen, caffeine, and dihydrocodeine combination is used to relieve moderate to moderately severe pain. Acetaminophen is used to relieve pain and reduce fever in patients. It does not become habit-forming when taken for a long time. But acetaminophen may cause other unwanted effects when taken in large doses, including liver damage. Caffeine is a CNS stimulant that is used ...
