Weber Revibe Grounding Issues - The Gear Page

New member here. I am most of the way through a Weber Revibe kit build. I decided to use Jeff Gehring's alternate grounding scheme and got the board prepped with a #14 gauge wire as my star ground in the same place as Jeff's in the build pics on Weber's site. Question #1, does a star ground get...

Weber vs. Eminence speakers - Telecaster Guitar Forum

I'm currently looking for a replacement 10" for my SFPR and trying to weigh my options for speakers. For years, I've been kind of high on the Weber cool-aid and figured they're about as good as a fellow can get. What I'm curious about, however, is the Patriot line of speakers from Eminence...

Celestion Gold vs Weber Alnico Blue Dog vs Weber Alnico Silver Bell in ...

It's supposed to be a higher wattage Blue, but I much prefer a Blue (more mids). The Weber Alnico Blue Dogs are a little thicker in the mid-range to lower-mids and I feel would be a better fit for the Black Cat. FWIW: I typically prefer Alnico speakers in all my amps, but I recently picked up a Bad Cat Cub 15r with the Bad Cat V30.

Weber High-Powered 10s - Any Experience? - Telecaster Guitar Forum

A while back, I picked up a used Weber California 10. Unfortunately, I've come to the conclusion that this speaker needs a recone. There seems to be some kind of voice coil rub happening, and overall the speaker just sounds dull, flat, and tired even with the aluminum dome which is supposed to...

Replacing speaker...Weber Sig's vs Weber Vintage??

Next question: Weber's Vintage 10A100 looks identical to the Sig specs (both 7oz, 1" voice coil, 15 watt),...but 2X the price! What would the difference be with these two speakers?

Honest opinions of current Weber Speakers - The Gear Page

I've tried many Weber speakers and I still don't know why they refer to some models as "vintage". Maybe some of them sound like vintage Celestion speakers, but none of them sound like vintage

Jensen speakers. I'm not saying that Weber speakers sound bad, they just don't sound like vintage Jensen speakers.

Holy Crap.. The Weber Signature Alnico Speaker has a 7 oz magnet ...

Ok, but if we look at the 12" Weber Alnico 12A150 it uses a 40 oz magnet and puts out 25 watts. The Singature 12" Alnico is also 25 watts but only uses a 7 oz magnet. In looking at Weber other offerings, however, I see that some of the Vintage line (not the sign line) also uses 7 oz magnets on the Alnicos.

weber DT 12 speakers - Telecaster Guitar Forum

Anyone else digging the Derek Truck webbers? I have a pretty unique 66 Gretsch and I was able to aquire the matching bottom but its empty. Thinkig about getting a set of these Weber 12" DT's for it. Anyone? :cool:

Weber 10a125 - Telecaster Guitar Forum

The Weber 10A125 would be comparable to a Jensen P10Q and has an 11 oz. alnico magnet and a 1.25" voice coil. The 10A125 would be my choice to keep the amp sounding close to original. FYI, I have two reconed 1961 P10Q's in my 1960 Super that were done at Weber with the 10A125 cone and 30 watt voice coil.
