Durable Execution Solutions | Temporal

Temporal is an open-source project that you are free to use and host in your own environment. You can also let us host the Temporal Service for you with Temporal Cloud.

Temporal for AI | Temporal

Temporal is a durable workflow platform that ensures AI applications run reliably, every time. Build faster, prevent failures, and stand out from the crowd.

How the Temporal Platform Works

The Temporal Service coordinates the execution of your application code—Workflows and Activities—by exchanging events with Workers. The Service can be self-hosted or fully managed and serverless with Temporal Cloud.

Temporal Docs | Temporal Platform Documentation

Temporal is an open-source platform for building reliable applications. Temporal delivers crash-proof execution by guaranteeing that applications resume exactly where they left off after crashes, network failures, or infrastructure outages, whether that happens seconds, days, or even years later.

Durable Execution Platform | Temporal

Temporal allows you to simply code for durable execution, using one or more of our SDKs in Go, Java, Typescript, Python and .NET (and even deploy polyglot workflows).

Temporal Platform on the Cloud

Use Temporal's open-source SDKs to write Workflows and Activities, which you manage and host in your own environment. All data transfer to the Temporal Service is encrypted before it leaves your environment.

What is Temporal? | Temporal Platform Documentation

Temporal is a scalable and reliable runtime for durable function executions called Temporal Workflow Executions. Said another way, it's a platform that guarantees the Durable Execution of your application code. It enables you to develop as if failures don't even exist.

Temporal Use Cases | Business Impact

Replit migrated their popular coding agent to Temporal to improve reliability and free up time for the Platform team. Temporal orchestrates the Replit Agent control plane layer at massive scale.

Temporal has been adopted by hundreds of thousands of global developers ...

Founded in 2019, Temporal has been adopted by more than 183,000 weekly active open source developers and has been deployed in over 7 million unique Temporal clusters, marking 600% growth in developer adoption in the last 18 months.

Get Started with Temporal | Learn Temporal

Take your first steps into building apps with Temporal by exploring how Temporal apps work.
