## **Windows 10 Bugs - Slow Startup, Can't Restart or Shutdown, No Icons ...**

Windows 10 Bugs - Slow Startup, Can't Restart or Shutdown, No Icons, Programs Hang, Taskmanager Resets, Search Doesn't Find Anything SOLVED (Not really): Windows finally got stuck at start up and tried to diagnose the problem but failed, so I was finally able to reset it in that dialog.

## **Slow Shutdown/Logout/Restart - Microsoft Community**

Can you try just restarting and see if that is slow. Can you try just shutdown and see if that is slow. Can you try a proper shutdown as per the following article, and after that complete shutdown, when next you restart, or shutdown, is the slow problem still there? With Windows 8, "off" isn't really off.

## **Spell Check in 2016 Word is Really Slow - Microsoft Community**

Spell Check in 2016 Word is Really Slow I just recently loaded 2016 on my daughters new HP Stream but when she uses Word, the spell check takes forever. It thinks about each jump for like a minute so the whole process is excruciating. Has anyone encountered this? If so please send some guidance my way. Thank you.

## **Windows 11 is Much Slower Than Windows 10 on High-End Hardware**

I tried to use Windows 11 several time on my high-performance laptop, and I'm shocked at how slow it is compared to Windows 10 —not just a feeling, but an obvious, measurable difference.

## **Excel 2010 slow when opening hyperlinks to the internet?**

Excel 2010 slow when opening hyperlinks to the internet? Hi! I have windows 7 and I run the newest version of Firefox primarily, I have no problem opening Excel but any link I have that opens in Firefox takes over a minute to open. I've tried removing all of the shortcuts from My Documents and that worked once, now it's back to being super slow.

## **Apps lagging, Windows system slow, and whole PC screwed the heck up ...**

Apps lagging, Windows system slow, and whole PC screwed the heck up! Lagging, Freezing, Crashing, Apps not responding, PLEASE HELP ME!!! As I said above, HELP ME PLEASE! I have a couple, like about 5 or 6, apps on my Windows 10 HP Stream 11 (Maybe 14) Laptop, and it's smooth and all, but then a couple days later it's fricked the heck up!

## **Broken Video Playback on Lower Refresh Rate Monitor**

It wouldn't just skip and call it quits on the skipped frames, it would come back to them, making the video impossible to watch, along with slow downs (instead of 30fps, it would drop down to those 30 frames over 1.5-2 seconds, before speeding back up and recovering), makes video playback on the second monitor impossible.

## **Transfer Windows 10 license from computer too slow after recent update ...**

Transfer Windows 10 license from computer too slow after recent update Had been having some crashes, and planned to eventually transfer my Windows 10 to a newly purchased computer, but I did not get to fully prepare thanks to my old computer becoming basically non-functional after recent massive update (suppose the Creators). Here is the situation:

## **Windows 10 Stuck at Please Wait on boot - Microsoft Community**

Yesterday, I installed windows 10 on my laptop and it worked but was running very slow i turned the laptop off then came back to it later and it booted past the blue windows icon then the screen went black for some seconds then a green screen with the words please wait and the loading icon appeared.

## **Windows 8 problem with slow web page loading in any browser**

I just bought a computer with windows 8. The computer is set up and all drivers are ok. I have a 75mbit connection, and when running speedtest, I get 75mbit. When opening any web page, it uses 10-30 seconds to load a single page, if it loads the page at all. Speedtest.net loads slow, but the test is fast. When opening all the same pages at the same time with my windows 7 laptop, the site loads ...
