Don't miss common add-ons during hysterectomy procedures. With approximately 600,000 hysterectomies performed each year in the U.S., coding these high-volume procedures accurately is critical — not just for compliance, but for optimizing reimbursement.

Here's What You Need to Know to Code Your Hysterectomy Claims - AAPC

And if your physician performed a total laparoscopic hysterectomy, look to codes 58570-58573 or 58575 (Laparoscopy, surgical, total hysterectomy for resection of malignancy [tumor debulking], with omentectomy including salpingo-oophorectomy, unilateral or bilateral, when performed).

Weigh In on Hysterectomy Coding - AAPC Knowledge Center

Coding Clinic indicates that, for the vNOTES procedure, you would select from CPT® code range 58260-58294 as it captures “the vaginal hysterectomy based on what was performed during the operation and the weight of the uterus.” Although a laparoscopic device is utilized, the hysterectomy

is still performed vaginally.

Pinpoint Correct Hysterectomy Coding - AAPC Knowledge Center

With so many code choices, be sure all related procedures are accounted for. Although hysterectomy is a common procedure in gynecology practice, coding for it is a challenge due to so many code choices. Along with the surgical approach and extent (i.e., total or partial) of the hysterectomy, accounting for related performed procedures is key to code selection. Narrow Down Codes by Approach and ...

Correct Coding for Laparoscopically Assisted Vaginal Hysterectomy

This, in addition to the laparoscopic radical hysterectomy with pelvic lymphadenectomy code (58548 Laparoscopy, surgical, with radical hysterectomy, with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling (biopsy), with removal of tube (s) and ovary (s), if performed), is the third set of CPT® codes addressing the ...
